

## Atlas Copco Exploration Products Health and Safety Policy Statement

Management, Staff and the Joint Occupational Health and Safety Committee are committed to provide a safe and healthy working environment for all Employees. Should an incident/accident or illness occur or a disability arise in the workplace, which in anyway impacts employability, Management will work in co-operation with the Employee to achieve a successful and safe early return to work.

Management, along with the dedication of the Joint Health and Safety Committee has a goal to maintain the highest standards for health and safety to protect every person. We will act in the best interests of the Occupational Health and Safety Act and Regulations to uphold all aspects of the legislation.

Both the Joint Health and Safety Committee and Management strongly believe that accident prevention and efficient production go hand in hand, and therefore, high standards for each go together.

The law states, and Management agrees, that we will make every effort to provide a safe and healthy workplace. To ensure this success, safety policies and procedures must be followed, maintained and revised when necessary to ensure the continuing objective of reducing risk and injury is met. Management will ensure that any items or devices required for safe operations are provided and maintained in good condition through policies and procedures. We will act responsibly to ensure that measures and procedures prescribed are carried out in the workplace.

The Occupational Health and Safety Act make Supervisors and Workers accountable for Health and Safety. Supervisors will be held accountable for the health and safety of Workers under their supervision. They are responsible to ensure that machinery and/or equipment are safe and that Workers work in compliance with established safe work practices and procedures. Workers must receive adequate training in their specific work tasks to protect their health and safety.

Every Worker must protect his or her own health and safety by working in compliance with the law and with safe work practices and procedures established by our Company. Everyone is responsible to report both incidents and accidents and illnesses.

Health and safety is not an extra part of a job, but an integral full time component of each person's responsibilities whether Senior Management, Department Managers, Lead Hands, Workers, Visitors, Clients or Contractors.

Let's work together to eliminate incidents/accidents and illnesses for a safer, healthier workplace.
