

Atlas Copco Exploration Products Environmental Policy

Atlas Copco Exploration Products develops, manufactures, markets equipment for mineral exploration and manufactures equipment for rock reinforcement.

Atlas Copco Exploration Products has the commitment to preserve the environment for future generations.

We strive to accomplish this through:

- Working according to the guidelines of ISO14001 ensuring continual improvements and prevention of pollution
- Contributing to a lower environmental impact from our products and services by attention to the design process, manuals and cooperation with our customers
- Limiting and constantly reducing the environmental impact on air, land and water from our production sites, offices, and transports
- Limiting the use of natural resources as far as possible
- Striving to develop and sell products with a limited impact on the environment in a life cycle perspective
- Making environmental issues a criterion when choosing a supplier
- Openly addressing environmental questions from outside the company
- Compliance with all relevant environmental laws and regulations and other requirements related to our environmental aspects to which the organization subscribes
- Evaluating environmental aspects (both significant and non-significant) on a continual basis
- Setting objectives and targets and reviewing them annually at management review.
- Communicating our environmental policy to all persons working for or on behalf of our organization.

This policy shall harmonize with the Atlas Copco Group policy.
